And remember to look out for the yellow
fish stencilled next to drains in your area!

What is the Yellow Fish campaign?

Did you know that most drains go directly to the river?
Our rivers can easily be polluted with chemicals from detergents, heavy metals and oil from vehicles and litter disposed of poorly. The Yellow Fish campaign exists to raise awareness and promote good practice to ensure that only rain goes down the drain.

How can you help?

Follow these tips to reduce your impact on your river:

- ✓ DO use environmentally friendly cleaning products
- ✓ DO dispose of all litter into bins
- ✓ DO wash vehicles less often

- » DON'T dispose of chemicals or oils in sinks, drains toilets, etc.
- » DON'T put any litter down the drain

Most importantly, remember that 'only rain goes down the drain'
