Construction details

## Project Description

Groundwork in partnership with Leeds Federated Housing Association worked to transform Woodville Square, a site which had fallen into disrepair and was in need of a radical facelift.

Groundwork carried out consultations with local residents and produced detailed landscape proposals for the site.

Elements in the finished scheme include new paving, retaining walls, steel fencing, timber clad bin stores, and shrub planting.

A parking space, using permeable paving, was included for every property and the street was lined with Cherry trees to soften the hard landscaping and create a sense of place.

**Client:** Leeds Federated Housing Association

**Budget:** Approx. £200k

**Services:**

- Community consultation
- Survey and analysis
- Planning
- Landscape design
- Detailed design
- Production of tender documentation
- Sustainable urban drainage

**Completion Date:** June 2014
