Understand - Change - Grow

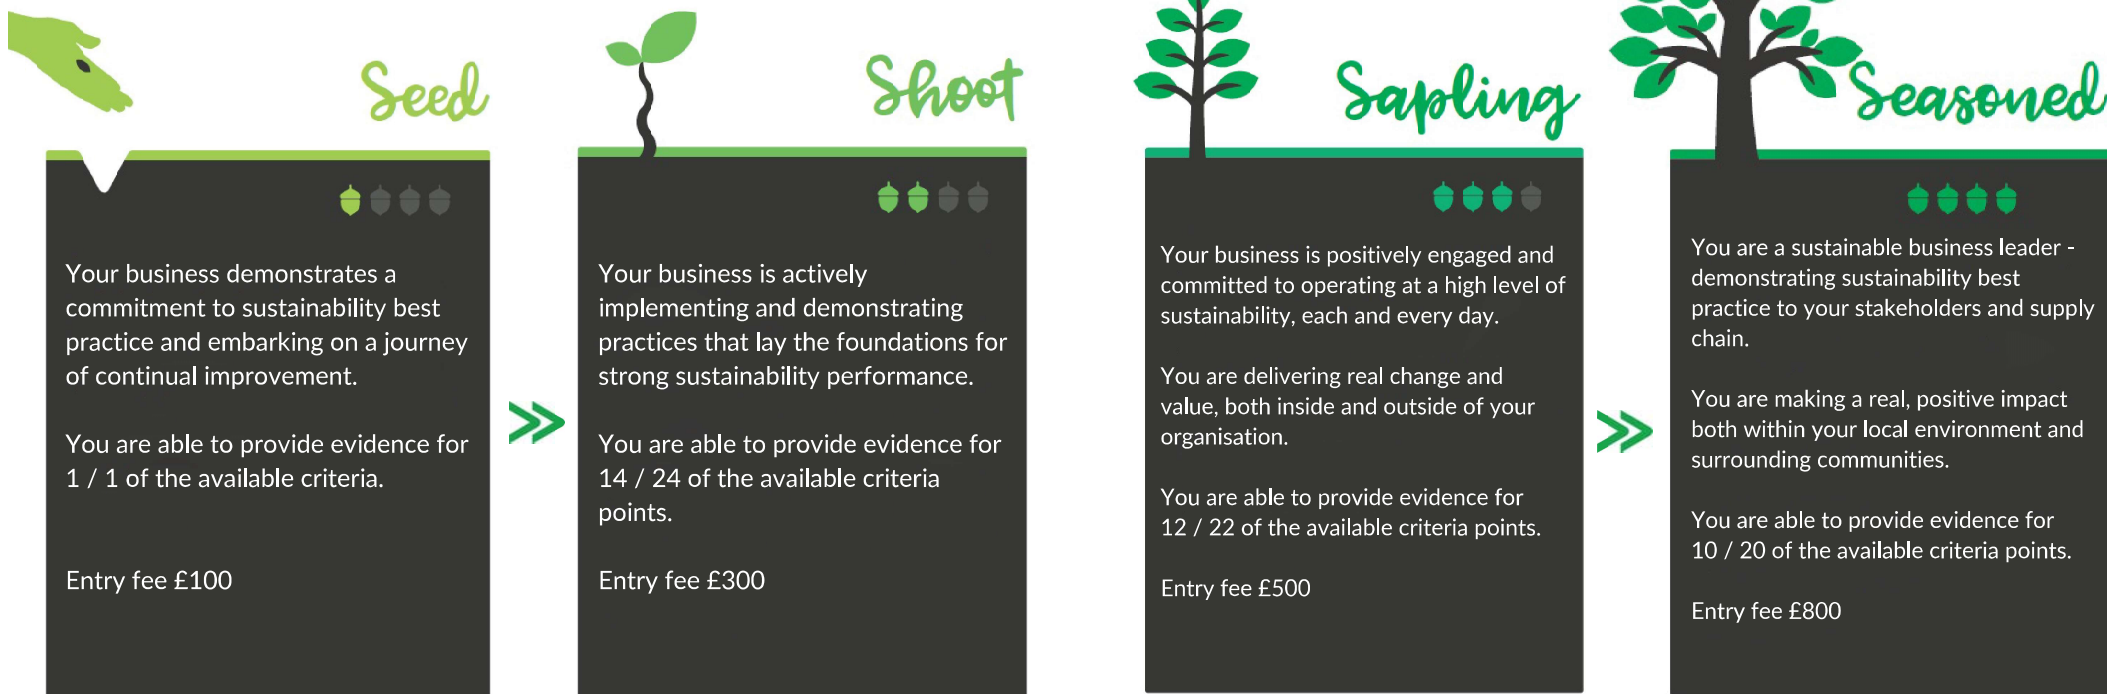

GROUNDWORK

> Sustainable Business Initiative

The Sustainable Business Initiative provides a clear framework for your organisation to understand & enhance its sustainability performance.

Moving through the different stages your organisation will have the opportunity to continually improve its sustainability credentials. Your hard work will be recognised and ongoing commitment to sustainability best practice demonstrated to your stakeholders.

Our professional sustainability consultants will help you develop your sustainability performance across 4 key areas:

>> 1. Environmental Performance

>> 2. Social Impact

>> 3. Health & Safety

>> 4. Quality Systems

On top of the efficiency improvements unlocked through engagement with the scheme, you will also benefit from the following:

- Online portal access to upload evidence & track your progress.
- Telephone support from our Sustainable Business Services team.
- Certification that recognises your hard-work & commitment - which can be demonstrated to your stakeholders.

Getting started

Groundwork's Sustainable Business Initiative is the perfect tool for understanding, improving and showcasing your organisations sustainability credentials to your stakeholders.

Here's how to get started:

- 1. Discuss your business' current sustainability performance with one of our consultants and agree the appropriate entry level for your journey.**
- 2. Once signed-up, you will have 6 months with which to upload the necessary evidence to your dedicated online portal. We are on hand to assist with any queries you might have during this process.**
- 3. Once uploaded, one of our consultants will review your evidence and sign off your achievement level.**

After allowing your new processes to embed, we can work with you to understand the next steps on your sustainability journey.

By working with Groundwork you enable us to continue delivering projects in Greater Manchester that Change Places & Change Lives.

Thank you for your continued support
